Summary

I'm a self-taught frontend developer. I love building websites while I improve constantly my skills and learn more about development technologies.

Skills

- React
- JavaScript
- Css3
- HTML5
- Jest
- Java
- Unit Testing
- Self-taught

Experience

My Portfolio:
I designed and developed my own portfolio, you can see all my projects there with live demos and GitHub repositories.
To make it I used React, JavaScript, CSS and Jest to unit tests.

- Github
- Website

Website for a beauty salon:
To make this website I used:
- React
- JavaScript
- Css3
- React router

This website has been designed and developed by me and it has a responsive design.
With this project I could consolidate my knowledge about the bases of React like the Hooks and JSX. In this website I used hooks to get some animations, also I was able to improve my skills with CSS.
- Github:
- Website.

Bill Software:
To make this desktop app I used: **Java** and **SQLite.**
This app is a bill software designed by me and it use a relational data base with SQLite. It has various modules to manage products, clients and invoices and it has a UI for the cashier where him can create new invoices and add or edit client's information.
- Github

Education

Bachelor in: **Information Technologies** - 2020-present (distance mode) **Universidad Particular de Loja**, Ecuador
